

eDriver Logs®

PAPERLESS. COMPLIANT. EFFICIENT.

With the ELD mandate going into effect, everyone is talking about electronic driver logs these days. But anyone can just sell you an ELD. You need a partner that understands (and more importantly, solves) the specific challenges of the oil & gas field.

At Trimble Oil & Gas Services, eDriver Logs® are tailored to do just that.

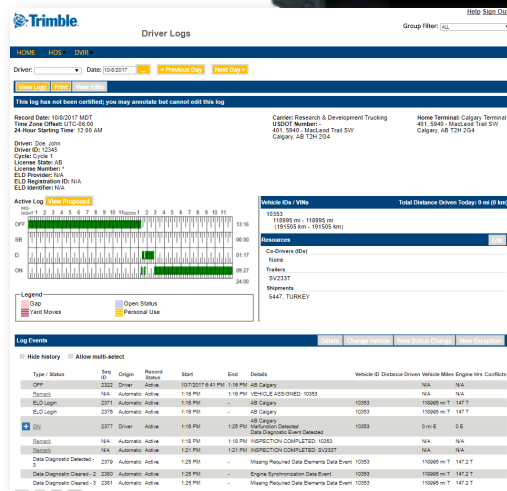

For years, we've studied the unique issues that come with transporting in the oil & gas industry. From navigating lease roads to dealing with rugged environments to factoring in time spent away from the truck, your drivers have enough to worry about. eDriver Logs® streamline solutions when it comes to Hours of Service, Records of Duty status, GPS navigation and more – so drivers can just focus on the drive.

eDRIVER LOGS® FOR THE REAL WORLD

Whether they're on the highway, at the oilfield patch or somewhere in between, our eDriver Logs® are built to guarantee your fleet maintains compliance – and more – at all times.

- ▶ Portable tablets allow your drivers to realize true mobility and optimize their Hours of Service both in and out of the cab.
- ▶ Web-based driver portals allow drivers to accept or reject edits from dispatch, whenever or wherever they are.
- ▶ Oil Well Service Exemptions allow maximized driving hours when your drivers are stuck in the field.
- ▶ Powerful and easy-to-use web map: Access the industry's best private road mapping service to find the fastest routes on public and private roads. Retrieve the information the way you want, when you want. Identify an area and replay what happened there.

Wherever your drivers are in the field, Trimble Oil & Gas Services' eDriver Logs® make sure they're always compliant wherever the job may take them.

Benefits

Platform features

- ▶ Exclusive oilfield web map
- ▶ Comprehensive reporting & dashboards
- ▶ Activity alerts
- ▶ Worker safety tools

Mobile application

- ▶ Easy-to-read screens to help facilitate stress-free roadside inspections
- ▶ Driver focused design includes:
 - Rest break button
 - Clear summary of when driving time will be gained
 - Color-coded remaining drive hours
- ▶ Optional integrated DVIR workflow
 - Inspections tied to vehicles/trailers allowing for communication of defects between all who use the vehicle
 - Carrier driven inspection checklist to provide consistency in inspection
 - Driver certification of completed repairs

Driver portal

- ▶ Easily manage conflicts and quickly certify logs
- ▶ Update duty status when access to tablet is not possible

Office portal

- ▶ Asset Control Center allows management of drivers and equipment all from one place
- ▶ Robust set of built in reports, such as Driver Availability and Hours of Service Violations, to track and manage your fleets

Robust reporting

▶ Summary Report

- Summary of 6-12 months of driver log records
- Used for internal audits
- Helps to review driver performance

▶ Daily Driver Log Report

- View available driver hours in real-time
- View miles traveled, off-duty, sleeper berth, driving on-duty, total on-duty, total on-duty per the regulation, available driving, available on-duty and hours gained

▶ Violations Report

- Summary of an individual driver or group of drivers' violations
- Full reporting within the compliance retention period (6-12 months)

▶ Hours and Miles Report

- Used to pay drivers for time spent on-duty driving, total on-duty
- Used for driver payroll
- Tracks total time on-duty and miles traveled

▶ Driver Log

- Snapshot of your driver's profile including company terminal trailer and vehicle information
- View available hours of service, duty status changes made any violations received
- Includes detailed graph of all driver duty statuses, including yard move and personal conveyance
- Flexible PDF and file printing capabilities
- Supports driver edits and back office proposed edits
- Supports Data File Transfer process for roadside inspections via web services and email
- Allows ELD exempt driver profile configuration
